& Skills

# RELATIVE GAPS: DOMAINS OF COMPETENCE

■ Ethics & Professionalism ■ Quality Assurance ■ Knowledge & Skills ■ Communication ■ Family, Community & Population Care ■ Patient care

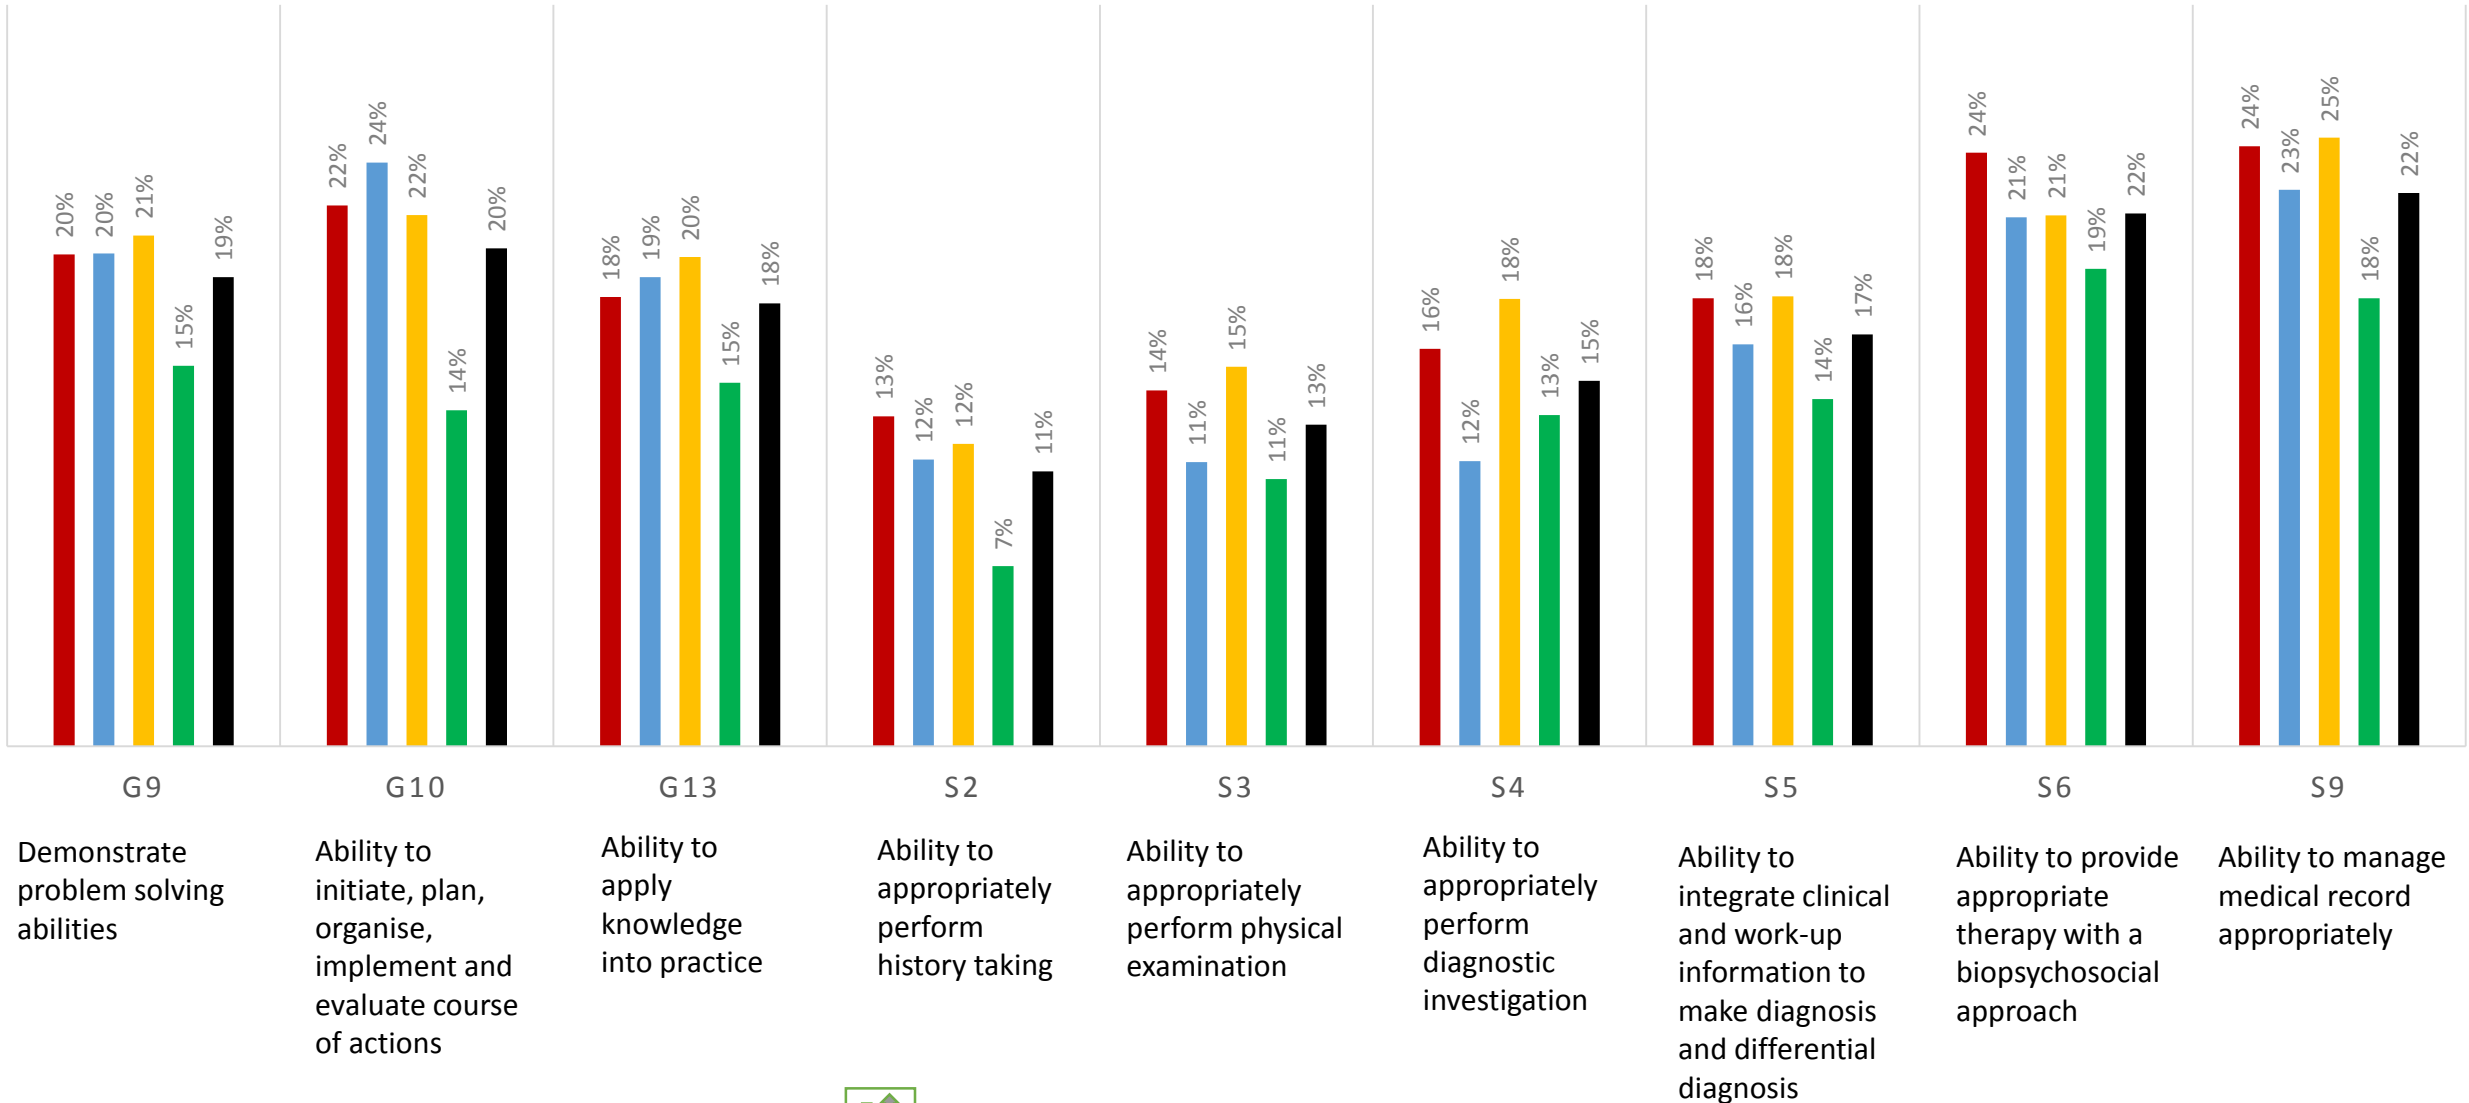

\*\*Relative gap (%) = (Importance – Achievement)/Importance

Lowest

# RELATIVE GAPS: KNOWLEDGE & SKILLS

Academic Employer Student Graduate Overall

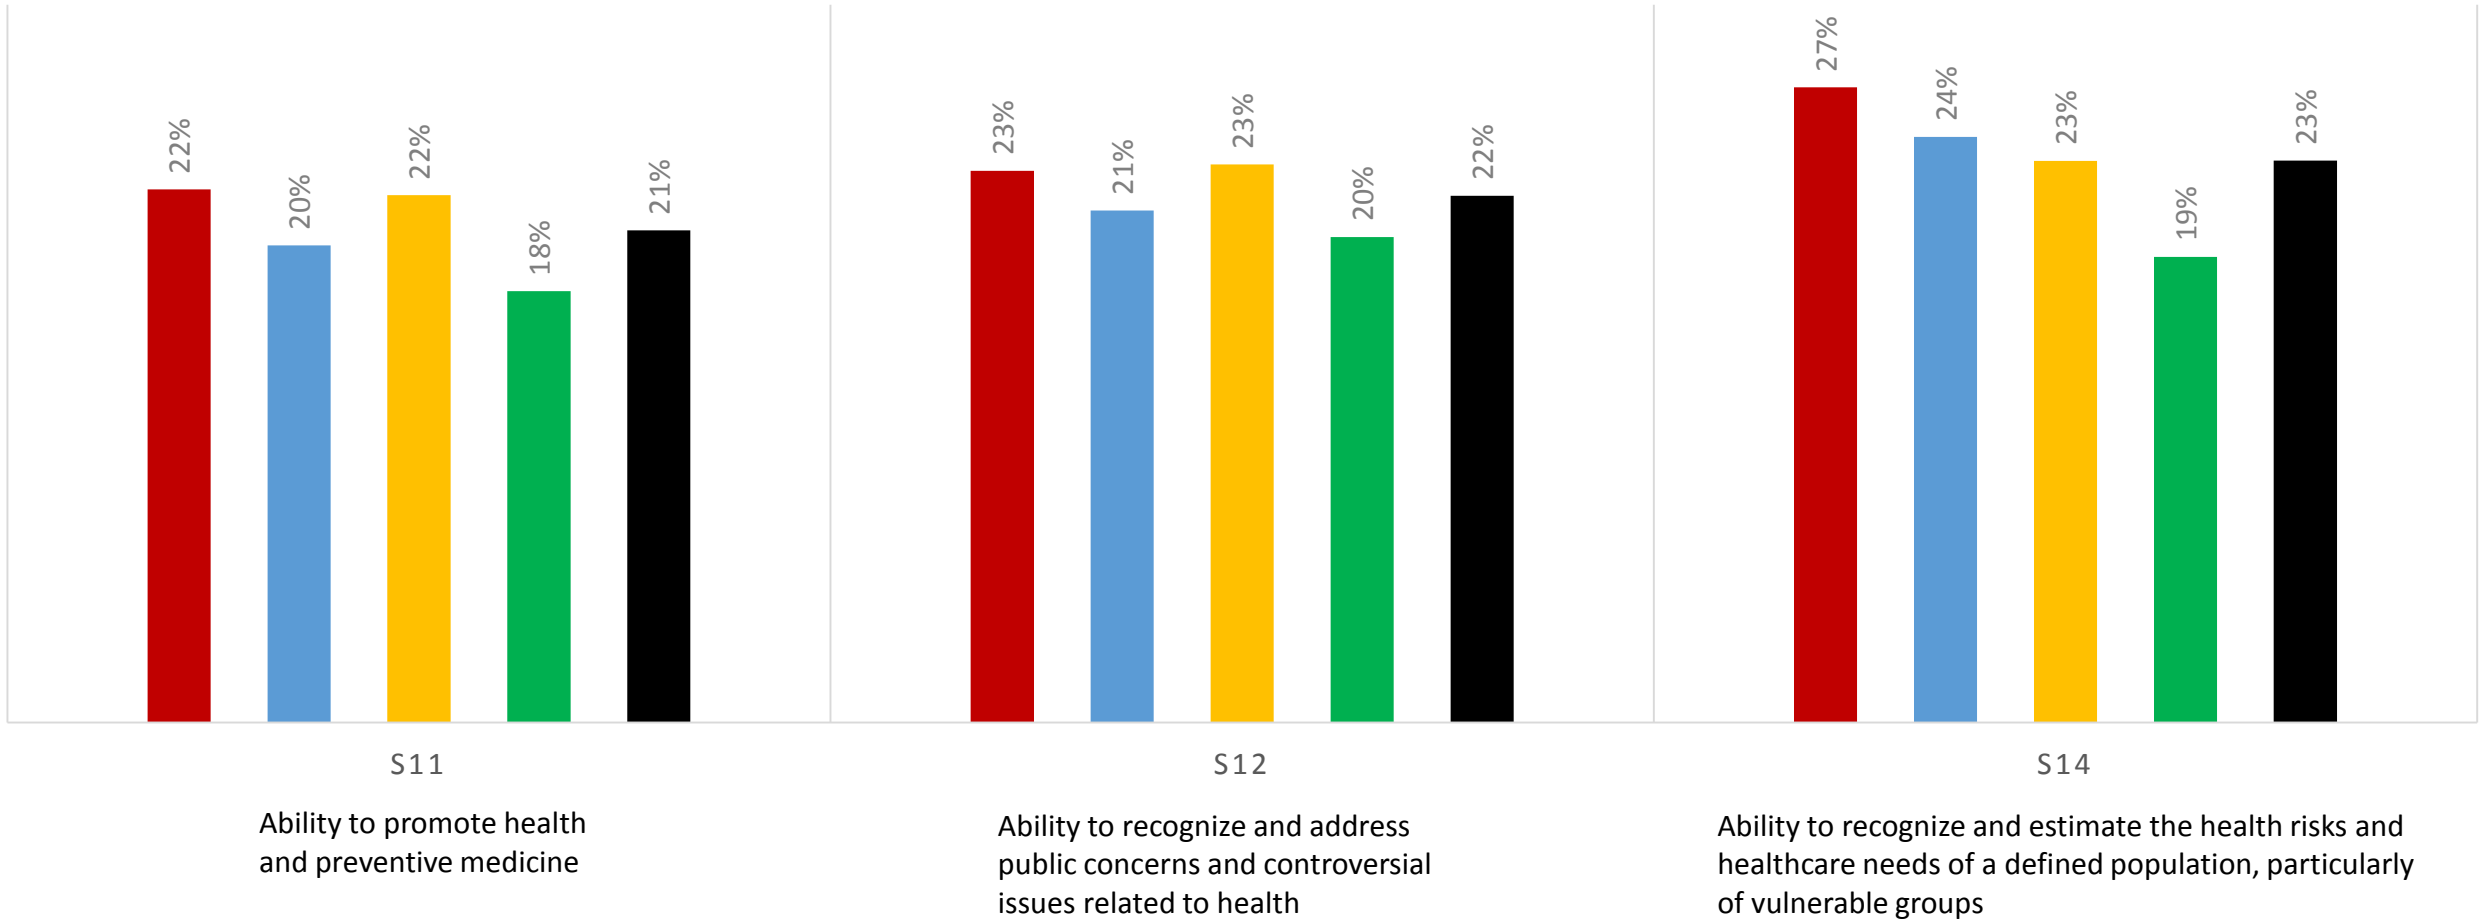

\*\*Relative gap (%) = (Importance – Achievement)/Importance

Highest

# RELATIVE GAPS: FAMILY, COMMUNITY & POPULATION CARE

Academic Employer Student Graduate Overall

\*\*Relative gap (%) = (Importance – Achievement)/Importance

# Highlights

- **Development of SEAMed Framework:** Six domains of competence were identified – 1) ethics & professionalism, 2) quality assurance, 3) knowledge & skills, 4) communication, 5) family, community & population care, and 6) patient care.
- All 27 generic and specific competencies were mapped in the six domains. Some competencies were classified in more than one domain.
- Each competence was perceived as important (3.3 – 3.8 in a scale of 4) by the four groups.
- **Achievement scores** were consistently lower than **importance scores** by approximately 20% (17% - 22%).
- Patient care is at the centre of SEAMed Framework.

# Thank You
