Tuning Asia-South East TA-SE

PROGRAMME

Policy Forum & Fourth General Meeting

Bangkok, 17-22 September 2018

CONCEPT NOTE

Tuning Asia-South East (TA-SE) project is aimed at the implementation of the Bologna tools in South East Asia universities through **building of a framework of comparable and compatible qualifications**.

To achieve this objective, the project is applying the Tuning methodology in **Civil Engineering, Medicine and Teacher Education**. For that reason, the wider **consultation on competences and students' workload** has been conducted in South East Asia with key stakeholders – academics, students, graduates and employers. The information received during these consultations is relevant not only for the project aims but also for the discussion in wider academic community.

The **practical aspect** of the project is reflected in the development, implementation, monitoring and improving of degree programmes for the first cycle by the participating Universities. The updated and modernised programmes are subject for broad discussion of **good practice in the implementation** of competence-based approach and ECTS-based programmes in South East Asia countries.

Tuning Asia-South East project is specially designed to promote **regional and international cooperation** between universities. For that reason, the **involvement of policy makers and decision makers** in the discussion of project findings is extremely important for sustainability of results and overall impact. Accordingly, **Policy Forum** is aimed to support **informed decision-making** in higher education policies of TA-SE partner countries, provide **evidence-based contemporary data** on competence-based approach, and present **good practices in the implementation** of ECTS based programmes.

Participants of the Forum are **academic and management staff** of TA-SE project, **decision-makers and policy-makers** in higher education, **representatives of Senior Officials Meeting on Education (SOM-ED)**, **representatives of the Government of Thailand** as well as **representatives of international organisations**. The Forum will serve as a platform that allow participants to share their experience, knowledge and vision, discuss the current strategies and future trends in modernisation of higher education in the South East Asia.

The Forum will serve as a platform that allow participants to discuss **current strategies and future trends** in higher education, to **share their experience, knowledge and vision** in related subject areas, to discuss the **project findings and its impact in the modernisation of higher education** in South East Asia region.
